Cookie provider	Cookie name	Cookie description
Google Analytics	_utma	Used to identify unique visitors. It expires after 2 years from the date it was last refreshed. The cookie is updated every time data is sent to Google Analytics.
Google Analytics	_utmb	Used to identify a web session and to store information about the session. Google Analytics end the web session when this cookie has expired. The cookie is updated every time data is sent to Google Analytics.
Google Analytics	_utmc	Not used in ga.js. Set for interoperability with urchin.js. Historically, this cookie worked along with the _utmb cookie to identify a web session. The _utmc cookies expires as soon as you close the browser window.
Google Analytics	_utmt	Used to throttle the request rate and expires after 10 minutes.
Google Analytics	_utmz	Stores the traffic source or campaign that explains how the user reached your site. It expires after 6 months; from the date it was last refreshed. The cookie is created when the javascript library executes and is updated every time data is sent to Google Analytics.
Google Analytics	_ga	Used to distinguish users and expires after 2 years.
Google Analytics	_gid	Used to distinguish users and expires after 24 hours.
Google Analytics	_gat_gtag_<property-id>	Contains campaign related information for the user. If you have linked your Google Analytics and AdWords accounts, AdWords website conversion tags will read this cookie unless you opt-out. Expires after 90 days.
